

San Joaquin Valley Air Pollution Control District

Permit Requirement Checklist

(Non-Residential Facilities Only)

Facility Address:		
Please answer each of the following questions. If you are not certain of the answer,		
check the "Yes" box.	<u>Yes</u>	<u>No</u>
1. Does your facility use any stationary internal combustion engines of greater than 50 hp?		
2. Does your facility perform mixing, blending or processing of any organic solvents, adhesives, paints or coatings?		
3. Does your facility create dust, smoke or incinerate any materials?		
4. Does your facility refine any liquids, solids or reclaim any metals?		
5. Does your facility paint, plate or coat anything?		
6. Does your facility have any combustion equipment? (e.g. boilers, ovens, furnaces etc.)		
7. Does your facility handle or store any solvents or motor fuels?		
8. Are any acids used or stored at your facility?		
9. Are any chemical processes used at your facility?		
10. Are any solvents dispensed or used for cleanup at your facility?		
11. Is your facility a dry cleaning operation, gas station, body shop or printing operation?		
12. Is this facility on the list of types of operations which automatically require a permit? (See reverse side for list.)		
13. Are you conducting a renovation in which over 160 square feet of building materials are going to be disturbed?		
If you have answered "Yes" to any of the questions, you must contact the San Joaquin Valley		

Air Pollution Control District to determine if your facility needs a permit.

The Small Business Assistance office is available to assist you and may be contacted at the Regional Office telephone numbers or addresses listed below.

> David L. Crow Executive Director/Air Pollution Control Officer

San Joaquin Valley Air Pollution Control District Air Pollution Permit Information Sheet

California State law requires city and county building departments to determine whether building permit applicants have met or are meeting the requirements of Section 42303 of the California Health and Safety Code.

This information is being distributed to persons whose equipment may be subject to air pollution regulations and is designed to provide guidance regarding the requirements of the San Joaquin Valley Air Pollution Control District (District).

District Rule 2010 requires that before any person builds, erects, installs, modifies, uses or operates any article, machine, equipment or other contrivance, the use of which may cause, reduce or control the emission of air contaminants, such person shall first secure a permit from the District. In addition, the District must be notified whenever such equipment is sold or transferred.

The District serves as the permitting agency for direct stationary sources of air pollution. Pollutants of interest include but are not limited to:

Volatile Organic Compounds (VOC)

Particulate Matter (PM)

Oxides of Nitrogen (NO_x)

Any Odorous Compounds

Oxides of Sulfur (SO_x)

Smoke

Carbon Monoxide (CO)

Dust

Toxic Air Contaminants (any compounds identified by the District, California Air Resources Board or Environmental Protection Agency as a toxic air contaminant)

Operations which usually require a permit include, but are not limited to:

Operations with any Air Pollution Control Equipment

Operations which Coat, Plate or Paint any Products

Operations which Store Organic Liquids

Asphalt or Concrete Batching Operations

Auto Body Shops

Cotton Gins

Dry Cleaning Operations

Feed and Grain Mills

Gasoline Stations or any Gasoline Dispensing Facility

Oil or Natural Gas Drilling or Producing Operations

Paint Spray Booths

Sand and Gravel Operations

Solid Waste Disposal Sites

Solvent Cleaners (degreasers)

Stationary Internal Combustion Engines > 50 hp

Wood Furniture and Cabinet Shops

Any Equipment that Handles any of the Following Substances:

Asbestos

Hexavalent Chromium

Fluorides

Beryllium

Mercury

Sulfuric Acid Mist

Benzene

Vinyl Chloride

Hydrogen Sulfide or Other Sulfur Compounds
